PASSION PROJECTS

Citi Bike Station Operations Data Platform
- Built an automated data pipeline and operations dashboard to monitor Citi Bike's day-to-day availability and service issues.
- Collects hourly live station data, validates, transforms and stores data, analyzes performance, and presents actionable metrics.
- Indicated KPIs such as disabled-bike rate and return/rental outage rate and created search filters to pinpoint struggling stations.

Is the Blockbuster Model Dead? – Blockbuster Film Risk Analysis
- Organized analysis into 4 categories: financial risk, content and IP strategy, genre and audience preferences, and release timing.
- Identified metrics such as profitability ratio, hit-or-miss rate, and YoY performance trends filtered by genre, IP type, and budget tier intended to optimize decision-making for strategic studio partnerships.

Country Music Audience Insights: Search Interest & State Demographics
- Developed a music audience analytics case study to compare country music search interest with state-level demographic factors, producing region-based insights relevant to fan segmentation, market opportunity, and music marketing strategy.
